Skills

- NextJS 13 | React | JavaScript | TypeScript | .NET MAUI | Java | C# | MySQL | MongoDB | Android Studio
- OOP | Data Structures | Optimization
- Cross Platform Development | Flutter | Dart | Full-Stack
- Machine Learning | Data Science | Pandas | NumPy | TensorFlow | Python

Experience

Back-end Engineer   **SoluLab**   **March 2023 - Present**

Client(s): XR Dimensions Studio (Back-end)

- Actively contributing as a Backend Developer in an esteemed project at **XR Studios**, a platform that empowers users to create captivating AR experiences and filters, focusing on the development of robust APIs using Typescript.

- Implemented **advanced authentication and authorization** mechanisms, **reducing security** vulnerabilities **by 25%** and ensuring secure access and permissions management.

- Employing best practices in data modeling, database design, and query optimization to enhance performance and reliability.

- Demonstrated expertise in **MongoDB data aggregation pipelines and filters**, employing advanced techniques to efficiently manipulate and retrieve data.

Web Development Intern   **KothariTech**   **August 2022 - February 2023**

- Led the creation of ReactJS and NodeJS documentation, **reducing onboarding time by 30%.**

- Delivered **300+ hours** of high-quality WordPress and Shopify solutions for **premium E-commerce clients**, achieving a **95% client satisfaction rate**

- Actively enhancing React skills, including **Redux for state management**, on diverse MERN projects, with a strong passion for **advancing expertise in React development**.

- Achieved a **90% issue resolution rate** while providing technical support to **10+ Shopify/WordPress clients**, ensuring seamless platform operation.

Education

Bachelor's of Computer Application (BCA)   **University of Maharashtra**   **2020 - 2023**
- Major in **Computer Application (Grade: Distinction | A+)**

Master's of Science (MSc.IT in AI)   **University of Mumbai**   **2023 - 2025**
- Major in **Information Technology (Specialization: Artificial Intelligence)**

Projects

- **Genasaur - SaaS Generative AI Platform** *(Full-stack):* [*Source*](#)
  (NextJS 13, React Hooks, TypeScript, Prisma, OOP)

  - **Efficiently** generates diverse **outputs** from **input prompts**. Achieves up to **90% accuracy** in generating textual content, images, audio, video, and code snippets.

  - It's a **SaaS AI platform** that **leverages OpenAI** and **Replicate APIs**, it achieves a **95% success rate** in content generation.

  - It offers a **seamless** way to **harness artificial intelligence** to meet various content generation needs, providing users with an **efficient and reliable solution**.

- **Promptomania - Open source AI Prompting tool** *(Full-stack):* [*Source*](#)
  (NextJS 13, OAuth, React Hooks, JavaScript, MongoDB)

  - It is an **open-source** platform where you can **create and share prompts** to **enhance** your **conversations with AI**.

  - **Seamlessly log in** to Promptomania using your **Google account** and start creating prompts that you can browse through and use to talk with AI in new and exciting ways.

  - You can also **view other users' profiles** to see their prompts, and **edit or delete** your own as needed.

  - A **'Prompt'** in this context refers to a **thought-provoking question, phrase, or topic** that can **stimulate AI responses.**
